

# Software Just as Reliable as You

**Grapher™**  
2D & 3D Graphing

**Surfer®**  
Contour &  
3D Surface Mapping

**Voxler®**  
3D Data Visualization

**MapViewer™**  
Thematic Mapping &  
Spatial Analysis

**Strater®**  
Well Log, Borehole &  
Cross Section Plotting

**Didger®**  
Digitizing &  
Coordinate Conversion

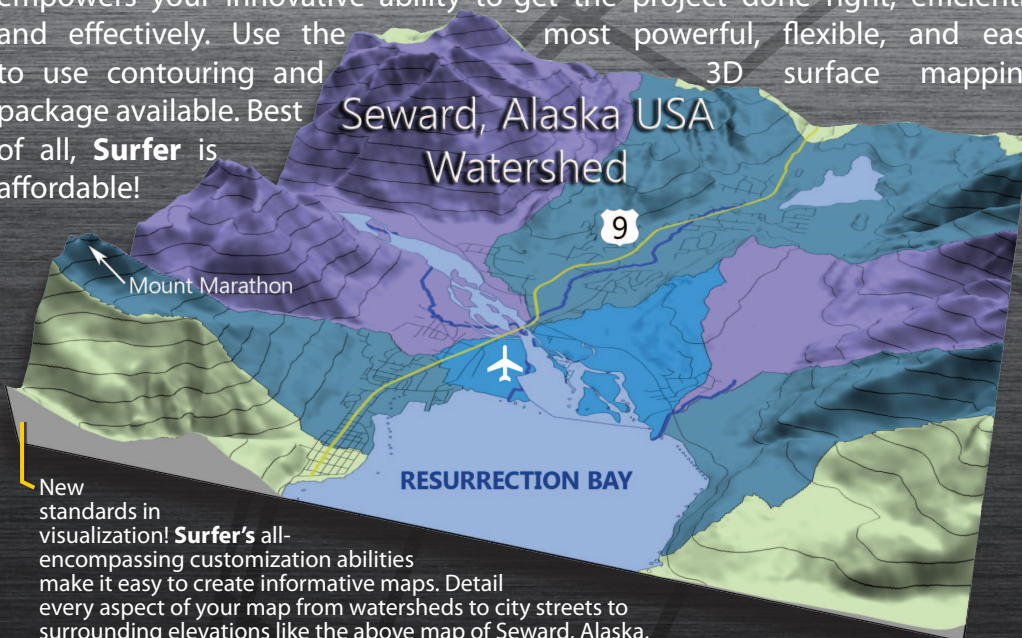

**GOLDEN SOFTWARE**  
All Products Brochure

## Propelling You to New Levels of Productivity

In a world packed with roadblocks, rules, and limitations, **Surfer** has none. It empowers your innovative ability to get the project done right, efficiently and effectively. Use the most powerful, flexible, and easy to use contouring and 3D surface mapping package available. Best of all, **Surfer** is affordable!

New standards in visualization! **Surfer's** all-encompassing customization abilities make it easy to create informative maps. Detail every aspect of your map from watersheds to city streets to surrounding elevations like the above map of Seward, Alaska.

**Upgrade** from any previous version **only \$229**

## Exceeding Expectations

*"I am very impressed with the ability of **Surfer**... It is far better than any other system that I have seen."*

Fred Robins, Geological Consultant  
Brisbane, Australia

*"**Surfer** is by far the best software product I have ever used...I gave a presentation of **Surfer's** capabilities to fellow co-workers and got a standing ovation. It sells itself."*

Barry Duncan, Senior Associate Geologist  
Syncrude Canada Ltd.

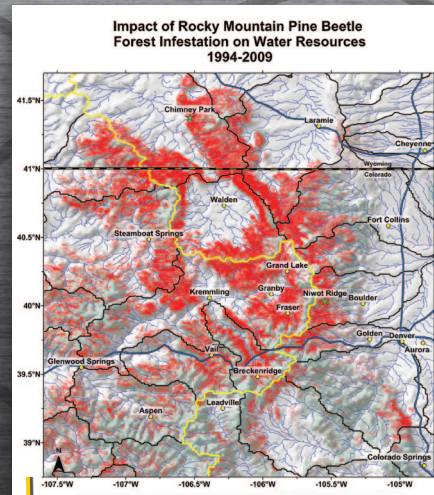

*"Short learning curve, user friendly, capable to manipulate millions of XYZ data points and many new file exchange formats are features which make **Surfer** the leading software for science and industry."*

Kyi Htun

*"Thank you very much for the copy of **Surfer**. My life just got a little bit easier."*

Neil D. Sharp

**Surfer® 11-only \$699**

Don't be intimidated by difficult data sets. This map was created using ten different data sets in more than five different coordinate systems. **Surfer** works seamlessly with all your data.

Tired of boring maps ruining your presentation? Add excitement and wow your audience with **Surfer's** endless display options. Your data never looked so good.

## Maps in Seconds

Don't let difficult software programs stress you out. Presentation-quality maps are a click away with **Surfer**. **Surfer** can massage your data in many ways to achieve the exact output you want and this outstanding program will quickly interpolate your XYZ data into useful, functional maps. Your data will be represented at its best when **Surfer** is doing the job.

## Distinctively Different

When it comes to maps, settle for nothing less than what **Surfer** delivers. **Surfer** accurately transforms your data into spectacularly colorful and informative maps. Extensive customization options are at your fingertips for complete control over your map's final display. Overlay or stack maps then scale, tilt, or rotate for the best data presentation possible. All aspects of your map are logically organized and readily accessible for one-click editing.

## Command Performance

**Surfer** picks up where other software packages leave off. Utilize the most extensive set of gridding methods and gridding parameters when you use **Surfer** to create your high-precision maps. You'll be blown away by the speed at which **Surfer** interpolates your regularly or irregularly spaced data and the resulting map will amaze any audience. **Surfer's** gridding capabilities are so robust, they are world renowned.

# POWERFUL GRAPHING

## Seal the Deal with the Ultimate Graphing Package

Don't compromise on graphing packages. Your data deserves the best and **Grapher** delivers only the best. **Grapher** is the ultimate graphing package available on the market. Discover how this easy to use, powerful, and dynamic program will present your information in a clear and concise manner. You will be creating superior and professional graphs within minutes and in no time, you'll be ready to seal the deal.

### Exceeding Expectations

*"I tell people if you can visualize a plot, you can make it with **Grapher**."*

Eric Tappa, Earth & Ocean Sciences  
University of South Carolina

*"**Grapher** is a very powerful piece of software."*

Brent Dreyer, Direct Services, Inc.

*"**Grapher** is a fixed part of my life these days - for work, research, and personal matters. I recommend it to anyone who will listen!"*

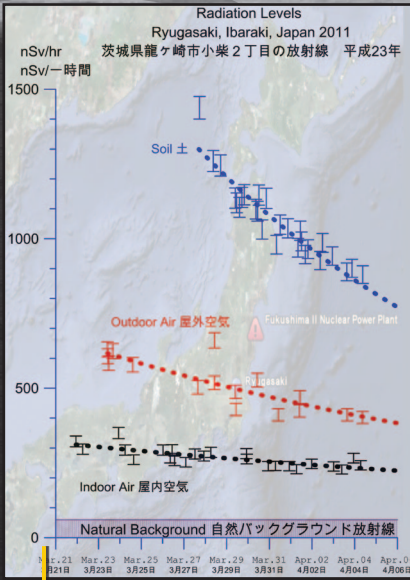

Stephen Ross, Japan

*"**Grapher** is such a fantastic program! People always ask our group how we did our graphs, and we show them **Grapher**. They see it working and go away to buy their own copy."*

Sally Finora  
Norman B. Keevil Institute of Mining Engineering

*"What really buys me is the exceptional quality of figures achievable (everyone could achieve) with **Grapher**."*

Igor Yashayaev  
Bedford Institute of Oceanography, Canada

Transform your graph into an international sensation. All aspects of your **Grapher** plot support international font so nothing is lost in translation.

## Grapher™ 9 only \$349

- Represent your data at its best with over fifty unique 2D & 3D graph types.
- Difficult decisions are easy with **Grapher's** numerous statistical analysis tools.
- Don't waste time repeating the same process over and over. Utilize **Grapher's** automation feature and simplify your life.
- Transform your presentation or publication into a memorable experience when you use **Grapher** to display your data.

### Don't Work Hard, Work Smart

Unless you find something to do the work for you. Let us introduce you to the **Grapher Wizard** which does just that. This powerful feature will create your perfect graph in minutes so you can move on with your day and focus on more important things, like the upcoming presentation for your potential promotion.

### Unlimited Possibilities

The possibilities are endless when you have **Grapher** working for you. Let your imagination run away with **Grapher** and create informative graphs that highlight all important aspects of your data. **Grapher** will create the most descriptive, understandable, and appealing graphs, ready for publication.

Upgrade from any previous version only \$119

Highlight the smallest details of your data with **Grapher's** infinite customization options.

## Let Grapher Work for You! Demo It Today

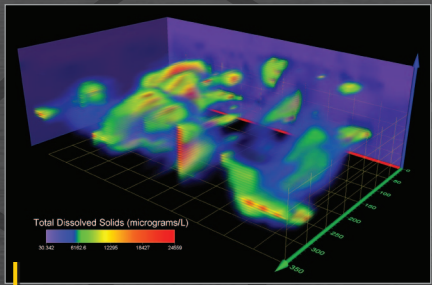

# Ditch the 2D World & Power Forward into 3D Data Visualization

Blow away the competition with **Voxler's** powerful 3D rendering and visualization features. **Voxler** takes your raw, complex data and models it in a rich, interactive, 3D visual environment. Display your data in an unprecedented variety of 3D images that are sure to impress even your harshest critic. Visualizing the depths of your data is almost too easy with **Voxler**.

You worked hard gathering your data so why settle for a yawn-worthy graphic? **Voxler's** graphical output will amaze your clients and set you light years above the competition.

Enhance your 3D volume model with vibrant colors to display the concentration of a dissolved solid.

**Upgrade from any previous version only \$159**

## Exceeding Expectations

*"I purchased **Voxler** and I cannot be happier! It's a wonderful product and I'll be using it very often."*

Jaime Hincapié  
Geophysics Director, CIGMA Radar Houston

*"**Voxler** looks like your crowning achievement. A great product. Well done!"*

Bill Knight  
Computational Fluid Dynamics Professional

*"Overall, a great piece of software...The abilities to rotate displays and adjust transparency are awesome."*

Gary Rice, President  
GeoFrontiers

*"I'm enthusiastic about **Voxler**! Nice layout, fast running."*

Dr. Niels Hartog, Research Fellow  
University of Waterloo

## See for Yourself! Download Your Free Demo

You know the saying, "A picture is worth a thousand words," so sit back, relax, and let **Voxler** do the talking.

View your data right down to the finest detail. No information is lost when **Voxler** is in control.

Simplify your decision making process by fully visualizing your well data in 3D so you can analyze and interpret every aspect.

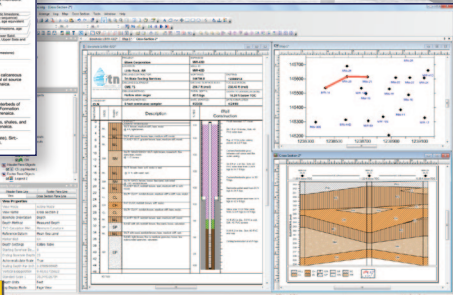

**Voxler® 3-only \$479**

# Eliminate Subsurface Uncertainty

**Strater** provides the answers to all your subsurface questions. When viewed in **Strater**, your data becomes crystal clear and easy to understand. Your subsurface analysis skills will be sought after when you utilize **Strater's** unparalleled well log and borehole plotting tools. Set the bar at your next meeting with **Strater**.

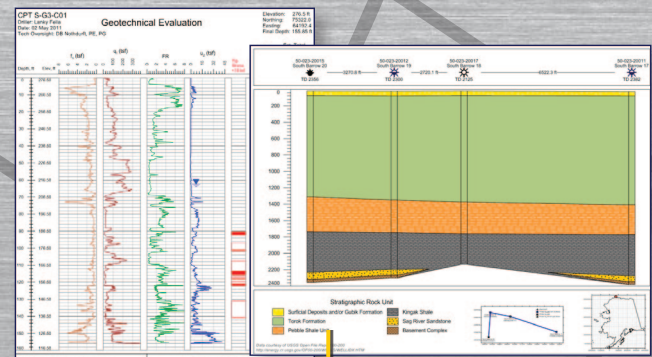

Don't become complacent with poor quality. Step out of the Stone Age and use **Strater** to display elaborately detailed boreholes.

Work seamlessly with all your data to create informative borehole logs, cross sections, and location maps.

**Upgrade from any previous version only \$149**

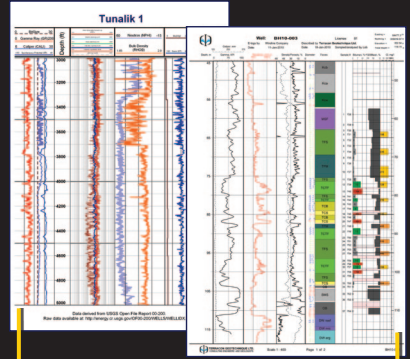

Detail all your information in the header and footer, such as well number, driller, location, and drilling method.

Wasting time isn't necessary when you have **Strater** doing the work for you. Creating detailed cross sections from your well data is a snap.

**Strater® 3-only \$449**

Order online at [www.GoldenSoftware.com](http://www.GoldenSoftware.com)

Display all of your geophysical data using **Strater**. Simply import your LAS files and use curves to display caliper, gamma ray, RHOB, NPHI, sonic, and other point data.

Communicate all your information in one view using several different log types for a comprehensive report that is sure to make an impression.

## Exceeding Expectations

*"I use it a lot in my consulting work to Oil & Gas companies. **Strater** is able to load LAS files very quickly and it is very useful having a software product that can read Excel and Access files with no fuss!"*

Jeremy Setter  
E.ON Ruhrgas UK E&P Ltd.

*"I'm loving **Strater**! It does everything we need it to do."*

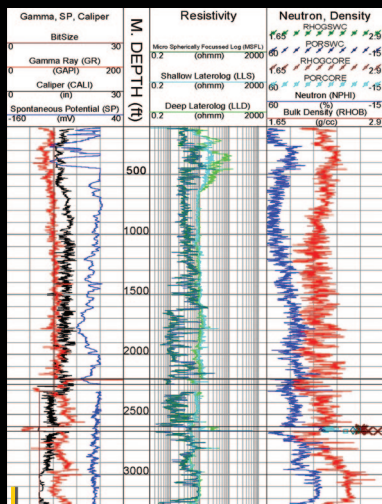

Vladimir B. Zivkovic  
Zivkovic Geophysical Investigations

*"My sincere compliments for your work with **Strater**. I have been working with **Strater** for two months delivering a daily report, sometimes I made it in the forest, sometimes in a running pickup and **Strater** never let me down, it always works!"*

Guillermo Chavez  
Enel Geonica

**Test Drive Strater! Download the Demo**

## Amp Up Your Geoprocessing Toolbox

**Didger** will enhance any software arsenal. Dynamically digitize any map, graph, aerial photo, site map, or printed image regardless of size. **Didger** will easily import and calibrate this well log and digitize the log information before exporting to any file format you choose.

## Exceeding Expectations

*"I found **Didger 4** provides other functions that allow me to accomplish some tasks easier...I am enjoying using it."*

Sonja Mathisen

Impress your peers. **Didger** will transform you into a digitizing, georeferencing, reprojection, tiling, and mosaicking master in no time.

**Don't Wait!**  
Download the Free Demo

Don't let digitizing slow you down. There has never been a more comprehensive, powerful, all-in-one software solution with robust digitizing, georeferencing, reprojection, tiling, and mosaicking features. Get rid of those dusty paper maps, graphs, and photographs and use **Didger** to precisely convert those ancient artifacts into a dynamic and modern digital format. **Didger** creates new maps from the ground up or edits any imported map, drawing, image, or data set for quick map or data overlays, data viewing, and projection conversions.

**Upgrade from any previous version only \$129**

### Stay in Control

Tablet, GPS, automatic or manual digitizing options are yours for the choosing.

### Save Money

**Didger** gives you free USGS topo maps & aerial photos.

### Don't Settle

An infinite number of projection & datum transformations are at your fingertips.

### Work Easy

Download TerraServer imagery, digital raster graphics (DRG) & orthophotos directly from **Didger**.

**Didger® 4-only \$389**

## Master Your Data

**MapViewer** makes the most of each and every one of your data points. This powerful thematic mapping and spatial analysis software package allows you to easily produce publication-quality maps, but it doesn't stop there. **MapViewer** also provides the tools to visualize and analyze the geographic distribution of your data so you can make the right decision, every time. Marvel at **MapViewer's** extensive features to produce the most elaborate and visually appealing maps.

Enliven boring reports when you use **MapViewer** to display your data.

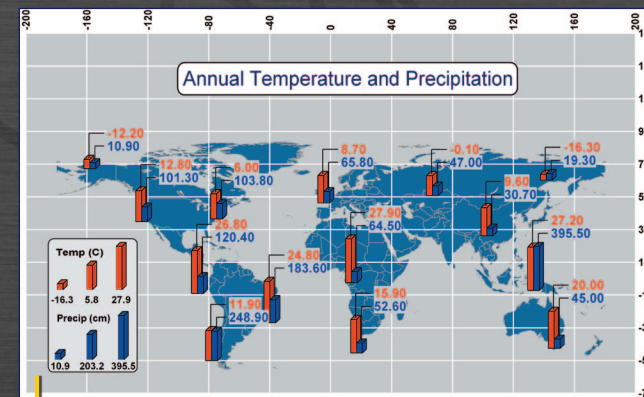

Don't be discouraged by multiple variables. **MapViewer** handles them with ease.

The possibilities are limited only by your imagination. If you can imagine it, **MapViewer** will do it.

**MapViewer™ 7**  
**only \$249**

**Upgrade from any previous version only \$79**

Enlighten your audience with comprehensive maps. The most complex data sets are no match for **MapViewer's** powerful features.

## Exceeding Expectations

*"**MapViewer** meets or exceeds its competition in terms of available cartographic techniques."*

Joshua Comenetz, Geospatial Solutions

*"I regularly promote **MapViewer** in workshops because it is so much easier to teach and use than most other mapping software that is available."*

Martha Sharma, National Cathedral School

*"Yet another demonstration of Golden Software's singular ability to produce user-friendly, efficient and effective spatial/map presentation software."*

John Cooper, Armino Tama Perkasa, Abadi PT

*"It is a wonderful, user-friendly product."*

Baojin Zhao (PhD.) Professor of Geology, Univ. of Fort Hare, S Africa

Revelstoke BC, Canada

## Free Technical Support

We are here for you. Whenever you have questions, consult the easy to read quick start guide, consult the dynamic help within the product or browse our 24-hour resources online at [www.GoldenSoftware.com](http://www.GoldenSoftware.com):

- Support Forums
- Product FAQs
- Knowledge Base

For additional help, Golden Software offers live technical support available Monday through Friday—always free to all users. In no time, you'll be a software expert.

*"Golden Software is in a class all its own. Your software is outstanding. But, what I really appreciate is when I have a problem, in a matter of minutes I can get a friendly, live, competent technician on the phone. Who else offers that service in this day and age?"*

Paul Lundegard, Ph.D.  
Environmental Geoscientist

## Great Software Since 1983

Golden Software has grown to be the leading provider of scientific graphics software in the world. Our customers include researchers in mining, engineering, and medicine, as well as thousands of applied scientists and engineers. Over 250,000 software licenses have been sold to date and our products are in use in 185 countries and on all seven continents!

We strive to keep you happy by providing the best technical support offered anywhere. 99% of our technical support phone calls receive an immediate response by one of our expert software support engineers. Of course, all technical support is free with the purchase of any Golden Software product.

New products are under development at all times, so expect Golden Software to continue supporting your scientific graphics needs.

Thank you for your interest in our software and we look forward to exceeding your expectations!

**GOLDENSOFTWARE**

## Order Today

Don't be left behind. Purchase any Golden Software product and see how easy it is to visualize your data. We offer a 30-day money back guarantee knowing our products will surpass any competitor.

Place your order today through our secure online order form at [www.GoldenSoftware.com](http://www.GoldenSoftware.com). If you choose to download, you will receive download instructions within 2 business hours and shipping charges are waived. In no time, your data will be ready for publication.

All product packages include the program license, quick start guide, free technical support, and free program updates.
